Site involves a facility with an overall purpose to produce something (not necessarily physical). A smaller structure within facility compound does produce something perhaps hazardous. Activity/operators filled up at Site ca. late '83, increased, then decreased last quarter 1984, then increased again, continue at high level. Idea that facility has been here along time but is now being "converted" or is hosting a new sort of project than when it was originally intended for, ^{may have to do w/ a change} (See p. 9) + not does something, ^{intended} perhaps involving high technology, or whatever. Some of physical + information ~~affiliates~~, ^{flux} like a S.A.P. here might be.
